INTRODUCTION

Celebrated every year around May 20th, International Clinical Trials Day (ICTD) is an opportunity for organisations, clinical research professionals and the public to acknowledge the achievements that result from clinical research and to discuss various trial topics.

The 2018 celebration of ICTD is organised by the European Clinical Research Infrastructure Network (ECRIN) and its Hungarian national scientific partner – Hungarian Clinical Research Infrastructure Network (HECRIN). ICTD 2018 brings together European and international stakeholders and aims to increase awareness of ECRIN and HECRIN – among Hungarian policymakers and the scientific community, as well as to address issues related to innovation and multinational clinical trials.

OBJECTIVES

/ To engage with the public, scientific community and decision makers on issues related to (multinational) clinical trials in Europe
/ To address in particular issues related to clinical trials and innovation
